Targeted Roles – Junior Front-End Developer | Full-Stack Developer

Multifaceted, detail-oriented professional with 7+ years of cumulative freelance, field, and academic experience in mobile application and web development projects offering a proficient comprehension of content management systems, database design/management, automation, and debugging processes.

Consistently demonstrates ability to complete a wide variety of freelance application and web projects, leveraging technical skills learned from professional development training to deliver high-quality products while adhering to assigned deadlines. Functions well in multidisciplinary team environments, diligently working alongside peers and superiors to complete projects with aplomb. Currently seeks opportunity to showcase wealth of accumulated technical skills as a front-end or full-stack developer.

CORE SKILLS & COMPETENCIES

- Content Management Systems
- Mobile & Desktop Application Development
- Application Testing
- Mobile Web Development
- Database Design, Management & Structuring
- UX Design Methods
- Custom Application Design
- Interpersonal & Written Communication
- Process Automation
- Responsive Design & CSS
- Visual Design Prototypes/Dynamic Webpages
- Debugging Processes

EDUCATION & PROFESSIONAL DEVELOPMENT

Diploma, Application Development with Mobile Web Specialization (Distinction, 96% Cumulative Average) 2020
Trios College | Toronto, ON

Relevant Coursework: Linux & Apache | Adobe Illustrator | Adobe Photoshop | Advanced Web Technologies | Android Development | C# & ASP.NET Programming | iPhone Development | Java Programming | JavaScript | jQuery & CMS Development | Mobile Web Development | PHP Programming | Programming Logic & Design | SQL Programming | Web Fundamentals

Academic & Independent Professional Development Project:

- ✓ **Slack Gamers – Mobile & Desktop Website (Academic, www.projectsbysteve.com/ex/sq/):** Created a compelling, interactive gaming website geared towards attracting shoppers and driving sales. Appealed to the online gaming community by creating an engaging, user experience via aesthetically-pleasing animation (used HTML5, PHP, BEM, BS4, CSS3, JavaScript, jQuery, Linux, and MySQL).
- ✓ **Reference Tracks – Mobile & Desktop Website (Academic, www.projectsbysteve.com/ex/newref/):** Built and developed a mobile and desktop website for a music retailer, filtering displayed music based on type and mood with *JavaScript* (used HTML5, CSS3, BEM, BS4, Jade, JavaScript, and Node.js).
- ✓ **Simon Says – iOS Memory Game (Independent, <https://github.com/steve-jrsm/iOS-Simon-Says>):** Designed a responsive memory game application for iOS mobile devices, demonstrating ability to write clean, semantic, and commented code via *XCode* and *Swift* (used XCode 11, Swift 5, Adobe Photoshop, and Adobe Illustrator).
- ✓ **War – Android Card Game (Independent, <https://github.com/steve-jrsm/android-war>):** Created a version of the classic card game 'War' including a trivia function capable of continuously generating random questions. Made use of an open *API/JSON* and a combination of mathematical functions to deal cards each round (used Android Studio, Java, Adobe Photoshop, and Adobe Illustrator).
- ✓ **GTA Driving School – Landing Page (Independent, <http://upass.online/>):** Authored a landing page for a GTA driving school, with the overall goal of creating a clean, responsive way to easily provide customers with important information thus creating additional business (used HTML5, BS3, CSS3, JavaScript).

EDUCATION & PROFESSIONAL DEVELOPMENT (CONTINUED)

Additional Formal Education (Continued on Next Page):

- Diploma, Business Administration (Selected Coursework) | Loyalist College | Belleville, ON
- Completed upwards of 13 *Udemy* courses, focusing on the understanding and refinement of technical concepts including web design and software development. Currently studying *GSAP, Angular, Vue, and D3*.
